EDUCATION

TOBB University of Economics and Technology

Computer Science

Expected: September 2026

Ankara

WORK EXPERIENCE

Inovat Mühendislik Sanayi Ticaret A.Ş.

Intern

May 2026 – Aug 2026 (Incoming)

Dinomore Games

Software Engineering Intern

May 2025 - Aug 2025

Ankara

- Led the technical development of "Voltline", a puzzle game successfully published on the Nintendo Switch Store.
- As lead developer of Voltline, I managed the complete production cycle and architected all systems within a demanding 3-month window using C# and Unity.
- Executed a comprehensive visual and gameplay overhaul for "LogIQ Boost", modernizing the project to meet current industry standards and enhancing user engagement.

Moralabs

Software Engineering Intern

Sep 2024 - Dec 2024

Ankara

- Assumed lead development responsibilities for "Twins & Dreams", managing core updates and feature implementations for Steam and mobile platforms.
 - Worked on the existing codebase and finalized the product for release.
- Designed and developed interactive playable ads for "Miss Katy: Royal Detective" using Cocos Creator and Typescript, enhancing user acquisition strategies.

PROJECTS

Intelligent Traffic Simulator - Graduation Project

- Designed and implemented an AI-powered traffic intersection simulator that combines PPO reinforcement learning, SUMO traffic simulation, and real-time web visualization; achieved a 15% throughput improvement and <50ms inference latency with a full-stack architecture.

Voltline

- A relaxing puzzle game I developed during my summer internship at Dinomore Games with Unity and C#.
- Successful release on Nintendo eShop.

ACTIVITIES

TOBB ETU Tennis Team Member

2023

- Played for the TOBB ETÜ Tennis team for a year in university competitions.
